### Safety Supervision: Making Defensible Decisions at the Front Line

## Healthcare supervisors make life-critical decisions. Can they defend them?

Clinical environments are high-stakes, resource-constrained and legally complex. Supervisors routinely make decisions that affect patient safety, staff wellbeing and organisational liability — often without the tools to document and defend those decisions.

#### LEGAL CONTEXT

*Healthcare organisations face dual exposure: clinical governance frameworks and WHS law. Supervisors who cannot demonstrate a structured decision rationale are increasingly vulnerable in coronial and WHS proceedings.*

Built for health services, aged care, and allied health teams.

### INVESTMENT

**\$497**
